## Professional Summary

Fourth-year B.Tech (CSE) student with hands-on experience in full-stack web development using the MERN stack. Interned as a Full Stack Web Developer at Pratinik Infotech. Proficient in REST API design, JWT authentication, and responsive React.js development. Participant in ArtPark CodeForge Hackathon at IISc Bangalore. Solved 150+ DSA problems.

## Education

**Dr. Ambedkar Institute of Technology for Divyangjan (AITD)** — Kanpur, U.P.
*B.Tech – Computer Science & Engineering (CSE-AI & ML)* — *2023 – 2027*

**Abhinav Vidyalaya, Prayagraj** — Prayagraj, U.P.
*Higher Secondary Education (Class XII) – CBSE Board — Secondary Education (Class X) – CBSE Board* — *2022 — 2020*

## Internship Experience

**Pratinik Infotech** — Remote
*Full Stack Web Developer Intern* — *March 2026 – May 2026*

- Contributed to UI improvements for a client-facing web application using the MERN stack, enhancing visual consistency and responsiveness across key pages.
- Collaborated with the development team to refactor React.js components, improving code reusability and reducing redundant rendering logic.
- Integrated frontend UI changes with existing Node.js/Express.js backend APIs, ensuring seamless data flow and stable end-to-end functionality.

## Projects

**ByteVibe – Full-Stack Blogging Platform** | *MongoDB, Express.js, React.js, Node.js* | GitHub | Demo

- Engineered a full-stack MERN blogging platform supporting user authentication, profile management, and role-based access control for secure content publishing.
- Designed and implemented 10+ RESTful API endpoints for complete CRUD operations on blog posts and comments, backed by MongoDB with Mongoose schemas.
- Built a responsive React.js frontend with a commenting system and dynamic routing, improving overall content interaction and user engagement.

**MERN Auth Kit – Authentication Boilerplate** | *MongoDB, Express.js, React.js, Node.js, JWT* | GitHub | Demo

- Architected a reusable authentication system with JWT-based session handling, bcrypt password hashing, and protected route middleware for full-stack MERN applications.
- Implemented secure user registration, login, and token refresh flows with role-ready middleware, reducing setup time for future projects.

**Travel-Buddy2 – Travel & Tourism Web App** | *React.js, HTML, CSS, JavaScript* | GitHub | Demo

- Developed a responsive React.js travel website enabling users to explore destinations, routes, and travel blogs through an intuitive UI.
- Implemented client-side routing with React Router and built reusable component library covering Home, About, Blogs, and Places pages.

## Technical Skills

**Languages**: C, C++, JavaScript (ES6+), Python, Java
**Frontend**: React.js, HTML5, CSS3, Bootstrap 5, Tailwind CSS
**Backend**: Node.js, Express.js, REST API Design, JWT Authentication
**Database**: MongoDB, Mongoose ODM
**AI / Data Science**: NumPy, Pandas, Matplotlib, Scikit-learn (basic)
**Tools**: Git, GitHub, VS Code, Postman, npm
**CS Fundamentals**: Data Structures & Algorithms, OOP, Operating Systems, Cyber Security

## Achievements & Certifications

- Reached **Prototype Development Round** of **ArtPark CodeForge Hackathon** – **IISc, Bangalore**.
- Solved **150+ DSA problems** across LeetCode, Coding Ninjas, and GeeksforGeeks.
- Completed **Full-Stack Web Development** certification covering MERN stack end-to-end.

## Extracurricular Activities

- **Event Management Team** – college festival *ShankhNaad*; active member of **Travel and Heritage Club**.
