Education

Dr. Ambedkar Institute of Technology for Divyangjan (AITD) — Kanpur, U.P.
B.Tech – Computer Science & Engineering (CSE – AI & ML) — *2023 – 2027*

Abhinav Vidyalaya, Prayagraj — Prayagraj, U.P.
Higher Secondary (XII) & Secondary (X) – CBSE Board — *2020 — 2022*

Internship Experience

Infosys Springboard — Remote
Java Full Stack Developer Intern — *Aug 2026 – Sep 2026*

- Developed **TripNest** – a full-stack travel planning and trip management web application, as the assigned internship project with end-to-end ownership across backend, frontend, database design, and deployment.
- Built RESTful backend services using Java Spring Boot with JWT and OAuth2 authentication, and designed responsive frontend interfaces using React.js and Tailwind CSS, integrating both layers for seamless data flow and stable user experience.

Pratinik Infotech — Remote
Full Stack Web Developer Intern — *March 2026 – May 2026*

- Contributed end-to-end UI and backend improvements to a client-facing MERN application, enhancing responsiveness and visual consistency across key product pages.
- Refactored React.js components to improve code reusability and reduce redundant rendering; integrated frontend changes with Node.js/Express.js APIs for stable data flow.

Projects

InterviewAI – AI-Powered Learning & Interview Prep Platform | *MERN, Gemini AI, Puppeteer, JWT* | GitHub | Live Demo

- Built a full-stack AI-powered interview preparation platform using the **MERN stack**, integrating **Google Gemini AI** to analyze resumes and job descriptions and generate personalized prep reports with 4–5 tailored interview questions.
- Designed a **Zod-validated AI pipeline** with structured prompt engineering for schema-consistent Gemini AI output, and automated **ATS-optimized PDF export** via Puppeteer.
- Implemented secure **JWT authentication** with httpOnly cookies and token blacklisting, RESTful APIs for resume parsing, and MongoDB Atlas persistence; deployed on Vercel + Render.

ByteVibe – Full-Stack Blogging Platform | *MongoDB, Express.js, React.js, Node.js* | GitHub | Live Demo

- Engineered a full-stack **MERN** blogging platform with **JWT authentication**, role-based access control, and 10+ RESTful API endpoints supporting complete CRUD operations on posts and comments.
- Built a responsive **React.js** frontend with dynamic routing, SEO-friendly slugs, and a commenting system, backed by MongoDB and Mongoose schemas; deployed on Vercel + Render.

MERN Auth Kit – Production Authentication Boilerplate | *MongoDB, Express.js, React.js, Node.js, JWT* | GitHub | Live Demo

- Architected a reusable, production-ready **authentication system** for MERN applications with JWT session handling, bcrypt password hashing, and protected-route middleware.
- Implemented secure registration, login, and token-refresh flows with role-ready middleware, designed as a scalable, plug-and-play foundation for future full-stack projects.

Technical Skills

Languages: C++,Python ,Java
Frontend: React.js, Next.js, HTML5, CSS, Tailwind CSS, Bootstrap
Backend: Node.js, Express.js, Spring Boot, REST API Design, JWT Authentication
Database: MongoDB, Mongoose ODM, MySQL
Tools & Deployment: Git, GitHub, Vercel, Render, VS Code, Postman
CS Fundamentals: DSA, OOP, DBMS, Operating Systems

Achievements / Extracurricular

- **Coding Expertise:** Solved **300+ problems** on platforms like LeetCode, GeeksforGeeks, and Coding Ninjas, achieving a strong understanding of algorithms and data structures.
- **ArtPark CodeForge Hackathon**: Advanced to the **Development Round** of CodeForge Hackathon, hosted at **IISc, Bangalore**.
- **Certified in Web Development (Udemy)**: Completed the **Complete Web Development Course** (100 total hours), covering HTML, CSS, JavaScript, React.js, Node.js, Express.js, and MongoDB. Certificate Link
